RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

I Semester B. E. Regular / Supplementary Examinations Feb/Mar-2025

INTRODUCTION TO WEB PROGRAMMING

Time: 03 Hours *Maximum Marks: 100*

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer five full questions from Part B. In Part B question number 2 and 11 are compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8 & 9 and 10,11(Lab Component-Compulsory)

PART A

			M	BT	CO
1	1.1	What is the correct *CSS* syntax for making all the <p> elements bold?	01	1	
	1.2	Identify the *HTML* tags: a) To make text look different from surrounding text. Usually taken from a different source. b) To display the *C++* program on a website.	02	2	
	1.3	Differentiate between and tag?	02	1	
	1.4	How do you display a border with the following specifications in *CSS*? The top border=10 pixels The bottom border= 5 pixels The left border= 20pixels The right border= 1pixel	01	2	
	1.5	Which property is used to perform the tiling of the background image in *CSS*?	02	1	
	1.6	What is the output of the following JavaScript code? *< script type = "text/javascript" >* *var no = 10;* *var str2 = no.toString(2);* *document.write(str2);* *</script >*	01	2	
	1.7	Write a *SQL* statement to select all the rows from a given table.	01	1	

PART B

2	a	How domain name conversion happens on the web? Describe the concept, with a figure, by considering a suitable example.	04	1	
	b	How are the *HTTP* requests sent and how the *HTTP* responses are sent by the Server? Give an example for both request and response structure.	10	2	
3	a	Design a *HTML* Form to collect information from Students/Alumni to store their personal information. Use appropriate *XHTML* code wherever applicable. i) Collect Name, StudentID, Age through text box. ii) Gender (Male/Female) and Currently studying(Yes/No) to be collected through radio buttons. iii) Use appropriate *HTML* Element to collect Student Address. iv) Use drop down list to collect Year of passout(2017 – 2022).			

		v) Use checkbox to allow the student/alumni to check his interests (eg : Networks, Programming, Personality development etc... any five)in addressing senior/current students in the institute. vi) Create a button with the name "Submit".	10	2	1
	b	Create *XHTML* document that has two equally divided frames. The left frame displays the contents.html and right frame displays the cars.html where second frame is the target of link from the first frame.	04	2	1
		OR			
4	a	Design an *XHTML* code for constructing a following table to illustrate table handling in a web page. Properly align cells, give suitable cell padding and cell spacing.	10	3	1
	b	What is the use of Definition list in HTML? Give an example.	04	1	1

SAMPLE COURSE TIMETABLE		
Day1	*Lecture Timings*	9.00 – 10.00
		10.00 – 11.00
		11.30 – 12.30
	9.00 – 11.00	*Lab component*
	11.00 – 11.30	*Break*
Day2	9.00 – 11.00	*COURSE1*
		COURSE2
	11.30 – 12.30	*COURSE3*

	a	Explain the following selector forms with an example for each. i) Simple Selector ii) Class Selector iii) Id Selector iv) Universal Selector	10	2	2
	b	Write an *XHTML* document that contains at least two lines of text from a textbook. Every verb in the text should be blue, every noun must be yellow & every preposition must be green and specify the styles in an external style sheet and use class selector form.	04	2	2
		OR			
	a	Design an *XHTML* page to demonstrate wrapping of text around an image. The image should be placed right.	04	2	2
	b	Create a web page by writing an *HTML* document that has two paragraphs of text with the following properties: i) Margin of 10px to the top & bottom and 12px to the left & right ii) Padding of 5px to the top, 11px to the right, 14px to the bottom, and 15px to the left iii) The text should be aligned and decorated in the center of the web page. iv) All the border style, width and color should be different for all the sides of a border.	10	3	2
	a	Write a program to make a simple calculator to perform the arithmetic operations (Addition, Subtraction, Multiplication and Division) in the JavaScript. i) Simple calculator using else if ladder ii) Simple Calculator using switch statement Note: The user is prompted to enter an operator (either +,-,* or/) and two numbers.	10	3	3

	b	Write a JavaScript program to input a string using prompt() method and convert that into lowercase.[Use string object method]	04	2	3
		OR			
8	a	How will you create an Array in JavaScript. With an example, explain the following array methods to perform different operations. i) push() ii) pop() iii) shift() iv) unshift()	08	2	3
	b	Write a JavaScript program to print the sum of first n natural numbers using for loop.	06	2	3
9		Explain the following statement in *SQL*. Give an example for each. a) Create b) Insert c) Delete d) Drop	14	2	4
		OR			
10		Consider the following relations for *MAILORDER* relational schema describing the data for a mail order company. $PART(Pno, Pname, Qoh, Price)$ $CUSTOMERS(Cno, Cname, Street, Zip, phone)$ $EMPLOYEES(Eno, Ename, Zip, Hdate)$ $ZIP_CODES(Zip, city)$ $ORDERS(Ono, Cno, Eno, Received, Shipped)$ $ODETAILS(Ono, Pno, Qty)$ With a sample *SQL* statement,Explain the following queries a) Insert one record into each table b) Retrieve the name of parts that cost less than *Rs* 200 c) Remove a record from *ODETAILS TABLE*. d) Drop *ZIP_CODES* table from the database. e) Display the *CUSTOMER* details whose name is 'John'.	14	3	4
		Laboratory Component			
11	a.	Design an *XHTML* document with a JavaScript code that contains a function called check_*USN* which tests the University Seat Number of the format $D123-22-9876$. The first letter can be D, S, T or L. Then a three digit college code. It should be then followed by the branch code which will be of two digits. Finally there should be four digit candidate code and display whether the given USN is valid or not using alert method.	10	4	4
	b	Define Constructors in JavaScript. Write a program to create an Employee object with the properties namely EmpName, EmpNo, EmpAge & EmpSal and initialize the values for data properties. Display the details of Employee object by initializing the display method.	10	4	4
