Department of Mechanical Engineering

CIE – I

Date	19th June 2024	Maximum Marks	50
Course Code	ME122GL	Duration	90 Min
Course Name	Computer Aided Engineering Graphics	**USN:**	1RV23AS048

#	Questions	M	BT	CO
1.	Draw the projections of the following points on the same XY line, keeping the projectors 25mm apart. State their quadrants. i. Point A is in HP and 20mm behind VP ii. Point B is 40mm above the HP and 25mm infront of VP. iii. Point C in VP and 40 mm above HP iv. Point D is 25mm below HP and 30 mm behind VP v. Point E is 15 mm above the HP and 50mm behind VP.	10	L2	CO1
2.	A line AB is 70mm long and is inclined at 45° to the HP and 30° to the VP. End B is 15mm above HP and 20mm infront of VP. Draw its projections and find its apparent lengths and apparent angles.	10	L2	CO1
3.	A regular hexagonal lamina of 25mm sides rest on one of its sides on HP, the surface of the lamina is inclined at 45° to HP. Draw its projections.	15	L2	CO2
4.	A square pyramid of base sides 30mm and 60mm axis length rests on HP on one of its base edges which is inclined at 30° to VP. Draw its projections when the axis is inclined at 45° to HP.	15	L3	CO3
	OR			
5.	A pentagonal prism 30mm base edges and 55mm axis length rests on HP on one of its corner. Draw the projections of the prism when the axis is inclined at 30° to HP and axis appears to be inclined at 45° to VP.	15	L3	CO3

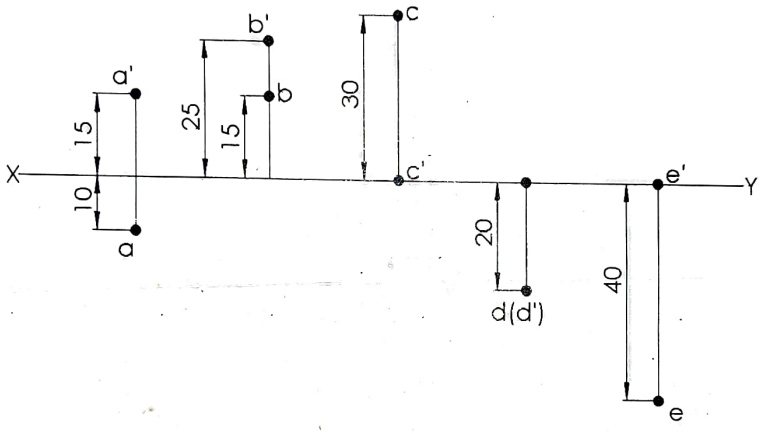

Academic year 2023-2024 (Odd Sem)

DEPARTMENT OF
MECHANICAL ENGINEERING

CIE 1

Date	28 Dec 2023	Maximum Marks	**50**
Course Code	**ME112GL**	Duration	**90 Minutes**
Course Title	Computer Aided Engineering Graphics		Sem: 1

Instruction: Answer all questions- Manual drawing only.

Q. No.	Questions	M	BT	CO
1	Figure 1 shows the projections of points A, B, C, D and E respectively. State their quadrants and distance from reference planes (distance from VP and HP).  **Figure 1: Projections of Points A, B, C, D and E**	10	2	1
2	The top view pq of a straight line 70mm and makes an angle of 60° with XY line. The end Q is 10mm in front of VP and 30mm above the HP. The difference between the distances of P and Q above the HP is 45mm. Draw the projections. Determine its true length and true inclinations with HP and VP.	10	3	2
3	The hexagonal lamina of 25mm sides resting on one of its corners on HP. The lamina makes 45° with HP and the corner opposite to corner on which it rests is 25mm in front of VP and nearer to it, such that two of its sides are perpendicular to XY line in the top view. Draw its front view and top view.	15	3	2
