Google Analytics

↓

Data modeling software.

URCHIN → software → Tracking system.

Google acquired URCHIN. 2005 it becomes google analytics

2005 - 2020 Universal Analytics

2020 → google Analytics. GA4.

2024 → closed universal analytics.

GA4 Vs UA

GA4

Event Based Tracking.

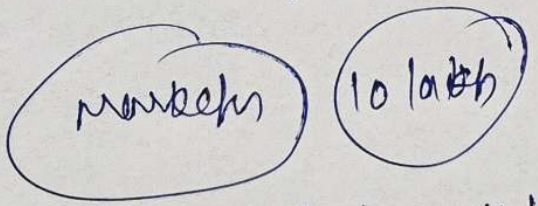

Conversion key events.

UA

Session based tracking.

Goal → URL.

GA Future

Insta.
Facebook
Email
SEO.
SMM

Decision :- where i will put these 10 lakh.

Data :- From which social media i am getting more conversion.

Functions of GA

Data collection.

Web design

- usability professional. - Bad news
- Its not Rocket science - good news.
- If its short its more like to actually be used.

different attributes of usability

- useful :- does it do something people need done ?.
- Learnable :- can people figure out how to use it ?.
- memorable :- Do they have to relearn it each time they use it ?.
- Effective :- Does it get the job done ?.
- Efficient :- Does it do with reasonable amt of time and effort ?.
- Desirable :- Do people want it.
- Delightful :- Is using it enjoyable ?.

A person of avg (or even below avg) ability and experience can figure out how to use thing to accomplish something

① Dont Make me think. (KRUG's First law of usability).

* self evident * self explanatory

Boston NY new york. BOS. Airport website.

on the internet, the competition is always one click away so if you frustrate users they will heard somewhere else

② How we really use the web.

scanning, satisficing & muddling through.

* How we think people use the website and How they actually use them.
* we dont read pages, we scan them.
  * we are usually on a mission
  * we know we dont need to read everything.

what we see when we look at page
we have in mind, and it's usually just a fraction
of what there".

we don't read instructions. why?

(1) It's not important to us.
How things work is not imp as long as we can use them

(2) If we find something that works, we stick to it.
we don't to look for a betterway.

(3) Billboard design 101. Designing for scanning, not Reading

* Take adv of conventions. :- follow existing conventions.
* create effective visual hierarchies :- The more imp something is, the more prominent it is.

(4) How many times you can expect users to click.
to get what they want without getting frustrated.
I think it's safe to say that users don't mind a lot
of clicks as long as each click is painless
and they have continued confidence that they are
on the right track.

(5) OMIT needless words.
The art of not writing for the web.
HAPPY talks must die
Instructions must die

(6) Street signs and Bread crumbs
Designing for navigation

Analytics & Reporting

The human factors.

- someone working at google designs the product.
- " installs google analytics on their website.
- " set up preferences & reports in google analytics.
- " uses those reports to make decision.

- product may be good set up may be wrong.
- set up may " " interpretation may be wrong.
- set up & interpretation may be good, program may be wrong.

Analytics
